L Series Cabinet Locks

8L Series – Mail Box Locks

The 8L7SPR mailbox lock features the convenience of the interchangeable core, allowing quick combination change, and is adaptable to a number of different mailbox manufacturers. The 8L7SPR can be masterkeyed into any existing BEST® system. Variations are available for adaptation purposes..

To order: Specify mail box manufacturer and style number, and/or send sample of mail box door.

8L7SPR (Inside)

8L Specifications

Housing – Steel, zinc plated

**Cylinder** – Machined from solid aluminum

Cylinder head diameter – 1-1/8"

Latchbolt – 9/32" square with bevel

Handing – Right-hand standard – 8LSPR

Finish – 627 standard

Call product support for manufacturer model assistance 800-392-5209.

1E Series – Slabbed Cabinet Mortise Cylinders

The special cylinders are threaded to the head, mounted with a hex nut, and slabbed on both sides to prevent turning in the mounting hole..

1E Specifications

Length – 1ED7D4: 1-15/32" from head to cam. 1EE7E4 1-1/4" from head to cam.

Cylinder diameter – 1-5/32", 7/8" across flats

Thread – 1.150 - 32 (NS - 2A)

Finish – 626 standard

1ED7D4
Direct motion cam pre vents key from being with drawn in unlocked position. Reversible cam may be assembled for required hand at in stal la tion.

1EE7E4
270° lost motion cam permits key to be withdrawn when locked or unlocked.

5E6 Series Specifications

"A" Body length – 31/32"

Body diameter – 3/4"

Body – 6 pin

Head diameter – 7/8"

Finish – 626

"B" Max. mounting thickness – 11/16"

5E7 Series Specifications

"A" Body length – 1-1/8"

Body diameter – 3/4"

Body – 7 pin

Head diameter – 7/8"

Finish – 626

"B" Max. mounting thickness – 27/32"

5E– Straight Cam

Standard 5E Assembly unit includes:

Keyed 3/4" with cam (specify cam length - if length is not specified, the 5EC1 x 7/8" will be supplied as standard), hex nut, spacer collar (not supplied unless length is specified), and lock washer.

Application:

Fits standard 3/4" cylinder installations for e.g. desks, file cabinets, coin-operated vending machines, utility cabinets, storage cabinets, elevators, and security alarm control panels.

Material finish:

Solid extruded brass cylinder body, 626 finish standard.

Cam motion operation:

TYPE "A" - Standard 5E cylinder key rotates 360º right or left.
TYPE "B" - Limited motion cam operation 90º or 180º as required.
TYPE "C" - Lost motion cam operation 90º: Key removal with cam in locked or unlocked position.
TYPE "D" - Throw member-type drive. Two throw pins engage key plug from rear of cylinder. (Direct 360º action-R or L.)
Throw member types available upon request.

Cam & Spacer Collar:

Cam variations are detailed in the cylinder catalog section and may be modified for use on the 5E cylinder. Standard cams are factory attached to key plug with screws. Spacer collars may be required to position the cam for proper lock operation. The spacer collar is installed between the 5E cylinder head and the mounting surface. Both straight collars and special tapered collars available by request.

To order: For more information see E series catalog section.

3S Series Sliding Panel Locks

Strike strap – stainless steel, 1/2" wide.

Locking housing – aluminum.

Finish – 627 aluminum only.

Operation – A stainless steel strap mounts permanently on the inner sliding panel. When panels are closed, the tongue of the strike strap extends beyond the edge of the outer panel. To lock panels, slide lock housing onto overlapping tongue and up against edge of outer panel. Lock by turn of key. Key is removable in locked position only.

Service Equipment

5ED253 Thread Tap
Matches standard 24 thread on 5E series cylinder locks.

To order specify: 5ED253 thread tap

5ED261 Capping Block
The capping process for single shearline 5E cylinders requires the following:

- 5E slide caps:
- 5ECP6– 6 pin
- 5ECP7– 7 pin

5E Cylinder:

- 5ED261 Capping Block
- 5ED262 Cap Depressor

Service Equipment for 5E Cylinders (single shearline)

BEST single shearline locks may be combinated to Grand Master, Master and/ or any operating combinations in your BEST system. Utilizes the AD433 Key Combinator. See (D Series) Service Equipment Catalog for details.

5ED250 Combinating Kit (single shearline)
Similar to standard CD431 kit for figure 8 cores, the singleshearline kit provides a special 5ED261 capping block, springs(5ES1) and caps (5ECP)

To order specify:

- 5ED250 - 2 (for A2 system)
- 5ED250 - 3 (for A3 system)
- 5ED250 - 4 (for A4 system)

Pin Segments (included in kit)
Close tolerance segments assist in accurate combinating.

To order: Contact your local BEST Representative.
Core Springs (included in kit)
This properly sized spring facilitates consistent action in all BEST figure 8 cores.

To order specify: 22S springs.

Core Caps (included in kit)
Barrels are securely sealed by applied core caps.

To order specify: 21C caps.

5ED253– Thread Tap

5ED261– 5E Capping Block

5ED250– Combinating Kit (single shearline)

CORMAX™ Patented Keying System

BEST® CORMAX™ is the premier patented keying system offered by BEST. CORMAX will meet your needs for security, key control, and convenience. A simple solution with no compromising allowed. CORMAX is the upgrade path for existing BEST Standard, Premium, and MX8 customers; and it is an essential element of non-residential access control as security administrators strive to eliminate the unauthorized duplication of keys.

CORMAX offers the following features and benefits:

CORMAX™
Patented Keying System

• A long-term US utility patent that guarantees the extended useful life of the system through 2027.

• A second, independent locking mechanism that utilizes a patented set of built-in side pins to provide higher security.

• Several levels of geographical exclusivity, including national exclusivity, are available via the patented side pin feature.

• CORMAX cores and keys are available exclusively through BEST sales offices. Key blanks are only sold to individuals authorized by the customer to ensure key blanks do not end up in the possession of unauthorized personnel either inside or outside the customer's facility.

• CORMAX cores are certified to meet the security, safety, and reliability requirements of BHMA A156.5 Grade 1.

• Picking and drilling resistance options are available if higher levels of security are desired.

• Complete factory masterkeying service offered, and at no charge with purchase of BEST locksets and PHI exit devices.

• Keyways are organized in families of four keyways each, with double-milled and quad-milled key levels to facilitate the design of masterkey systems in multi-building campuses.

• BEST CORMAX cores are compatible with all existing BEST interchangeable core housings, eliminating the need for new or modified locksets.
